Exterior Merchandising Excellence!

In today's cluttered array of advertising & merchandising media, your message at point-of-purchase reaches the highest percentage of your target market. Voxpop Marketing Systems makes products designed to maximize the effectiveness, professionalism and return-on-investment of this critical part of your mix.

From perfectly tensioned banners to dramatic flag displays or impact in the Drive-Thru, Voxpop has been improving the exterior merchandising profile for major international retailers as well as mom n' pop businesses since 1989.

We're judged by the companies we keep.

We wrote the book on hardware solutions for exterior media, and our client list says volumes about the success of our product line. Whether you are a large multi-national chain or a mom 'n pop corner store, we will fashion our products and services to fit your merchandising goals.

For well over twenty years, Voxpop has been assisting companies like yours on projects as small as a problem location to a system-wide roll out of a major campaign. We invite you to browse our catalog for products and ideas.

VOXPOP
MARKETING SYSTEMS

Banner Mounting Frames & Stands

Outdoor banners can be the most effective way to get your message out, whether you are trying to attract new customers or upsell existing ones. Voxpop's signature products are hardware frameworks that professionally display them. Above the roof, on the ground, on a wall or pole - even indoors! Our display hardware turns your banners into drum-tight signs, guaranteeing you the best results possible.

Our frames mechanically wind banners taut. They look fabulous and stay that way.

"The day I installed the roof banner we saw our sales increase. Every day since I've seen sales growth".

Nigel Nary
Golden Bear Restaurants (Arby's)

Get the message?

ROOFTOP Display

TopLine Banner Frame

Quantitative tests by major retailers have determined that the most effective outdoor point-of-purchase display is a large banner displayed above the roof line.

We created a heavy duty frame that not only elevates your banners above your roof, it tensions them into perfect looking signs. The TopLine Frame is a one-time investment for each location. The heavy steel and aluminum construction guarantees rock-solid performance for years and years.

We call it a "TopLine" for two reasons. One, it puts your message on top of your buildings. Two, it impacts its very name . . . your top line.

"Undeniably, putting our large banners on the rooftop generates the most traffic"

John M - Burger King

Stock sizes for banners from 3'x6' to 4'x24'

WALL Display

HangTight Banner Frame

A permanent and professional solution to stringing your banners on the wall is our HangTight Frame. Simply attach a couple tracks to the wall and the system does the rest. Your perfectly tensioned banners look more like a rigid sign - and work that way, promotion after promotion.

Prevent this forever.

The frame stretches your banners into perfect signs. Stock sizes for banners from 3'x6' to 4'x24'

An ingenious design!
The banner conceals the hardware.
No ropes, no sags, simple to use.
Clean, crisp, professional.
Laughs at the elements,
lasts a lifetime.

LAWN / DRIVE-THRU Display

Ground Mount Banner Frame

Whether you are attracting customers from the street or upselling in the Drive-Thru, well placed banners are a highly effective tool. Our Ground Mount Frame is the industry standard platform to display them. Rock solid design and construction ensures the maximum potential, this promotion and every other one for years. Ground banners need hardware. We wrote the book on it.

Our Ground Mount banner frame creates a mini billboard, placed exactly where it will do the most good.

Effective?

"Voxpop's hardware helps present an A+ image standard for our restaurants"

Joe, Taco Bell

Stock sizes for banners from 3'x6' to 4'x20'

You make an investment in your banners.
You expect results.
Make one more and guarantee great ones every time.

LAWN / DRIVE-THRU Economy Display

EZ Post Banner Stand

The EZ Post Banner Stand is designed as a professional alternative to homemade poles and strings for street level banners.

Underground fins stabilize powder-coated poles fitted with adjustable bungees that keep your banners straight and readable. Easy to use and easy on the budget, this system is designed for the less-occasional merchandiser who wants professional appearance and results.

Professional display for banners up to 10 ft

For about the same price as a homemade set of poles, the economy EZ Post system is a whole lot better.
And easier.

Jury rig.

Our rig.

POLE Display

Pole Mount Frame

Strong. Functional. Simple. Professional.

Anyone who has ever tested Voxpop's pole banner hardware against traditional "slats & springs" or other solutions has become a committed customer. The reason is because there is no better product in the world for displaying banners on poles of any kind. With 2 styles of "arms" to grip the banner, mechanical tensioning to pull them drum tight, simple installation and years of usable life, who would use anything else?

Pole banners need hardware. Voxpop's is the best there is, and the last you will ever buy.

Clamp Bar Arm profile

Tongue & Groove Arm profile

Arm style options for wind load and banner size

Single sided

Double sided

Sizes from small to oversize.

Mechanical tensioning winds the banner drum tight. The banner conceals the hardware. Perfect display every time.

WINDOW Display

SkyHooks Vacuum Cups

Turn your large window into a selling advantage with SkyHooks vacuum cups, designed for mounting banners on glass. These inexpensive cups have super gripping power and feature metal studs to insert through the banner grommets.

We call them "SkyHooks" because the finished display looks like the banner is hanging in thin air. No ugly ropes, no droops, and far bigger impact than window clings.

Sets from 4 and up depending on banner size

Sometimes you need something bigger than a window cling, where folks can actually read your message from the street.

STREET & PARKING LOT POLE Display

Avenue Banner Brackets

When it comes to "Avenue" or "Boulevard" style banner brackets systems, Voxpop has them all.

Want them adjustable? Fixed? On springs?
In a wing shape? Triangular? Economy?
OK! We have them. Call us.

WindSpill Series

Our best quality WindSpill brackets combine sand-cast aluminum mounts with fiberglass rods, designed for long or short term displays. The rods bend slightly to spill excess wind, rating them up to 75 mph. WindSpills offer a choice of Jr. and Deluxe style arms, depending on your banner sizes and length of display. Both are available either fixed or adjustable. Arms can be any length up to 36", with stock sizes at 24", 30" and 36".

Single Sided

Double Sided

Triangle Single

Triangle Double

"Jr" Fixed

"Jr" Adjustable

Deluxe Fixed

Deluxe Adjustable

Arm Options

Spring Action Model

Add a little motion to your display.

Embrace the wind and make it work for you! Our innovative Spring Action frame has an exclusive swivel and spring apparatus that creates attention-getting motion, then springs back into place. The handsome rails hold the banner intact while the secondary spring and swivel poles create the bobbing and weaving feature that make this display stand out from the norm. Different? Yes. Effective? Also yes.

Wing Shape Model

"And now, for something completely different!"

Want to make a statement? Take the fabulously successful "teardrop" flag concept and stick it on a pole. We call this exclusive new display "Wings" because . . . well . . . not only do they look like them, they will make your visibility soar.

Our Wings hardware displays specially sewn flag material as opposed to heavier banners. Call us about a complete turn-key program that will truly separate you from the crowd.

Wing Shape "flags" require special sewing specifications. Call for details or for a quote on a complete program.

Economy Model

Cheap & easy.

Money tight? We hear you. Fork over a little and get a whole lot with our Economy bracket system. Sand cast aluminum mounts with fiberglass poles are perfect for the budget, awesome for the results. Available single or double sided in 3 stock sizes up to 36" wide.

LAWN, SIDEWALK, DRIVE-THRU Display

Upright Frames

It's a flexible sign. Literally.

Voxpop's UpRight banner frames create traditional looking "signs" that provide the added value of interchangeability, positioning and cost effectiveness. For the chain retailer, it's the perfect solution. Your low-cost banners will look like high-cost signs. We can make them single or double sided, ground or sidewalk mounted, and in sizes up to 4ft x 8ft. Makes sense, doesn't it?

Standard In-Ground

Features mechanical tensioning, choice of arm styles, galvanized channel pole, and PVC ground sleeve.

Sidewalk Base

Same features as the Standard model with a heavy duty steel sidewalk base. Perfect for drive-thrus.

Water-filled Base

Optional water filled base fits the standard model, for flexible positioning wherever you need it most.

Economy In-Ground

Hand-tensioned on a thinner pole and set on a steel ground stake for super easy and flexible installations.

INDOOR Display

Telescoping Banner Stands

We've come in from the cold!
(Just a little, though.)

We leave most of the indoor display gizmos to the trajillion other guys who specialize in that stuff. But when you are the world leader in outdoor banner hardware, it makes sense to carry a few models for the inside. So we do.

Since these stands aren't battling the elements, we use simple telescoping poles to create tension. We powder coat them nice and pretty and offer a variety of styles and bases to best fit your pretty interiors. The best news of all? They don't cost a lot.

Heavier Duty

Lighter Duty

Economy Model

Side Stand

Swing Stand

Telescoping shafts for banners up to 90" tall

Variety of top & bottom grips for banners up to 48" wide

Variety of base options for all models.

3-D WALL Display

Dimensional Banner Frames

Project your message literally off the wall with one of our two exclusive 3-Dimensional banner display systems. Expect off the wall results too. There is no denying the impact created by these innovative frameworks. Awesome for Drive-Thrus!

If your sales are flat . . . unflatten your P.O.P.!

"Unparallel" displays for unparallel results!

45° Offset Model

Fiberglass poles project from 45 degree brackets to pop your banners off the wall. Simple, easy to install and easy on the pocketbook, this model can display a variety of banner sizes.

Wrap-Around Model

This ingenious design pushes out a flat banner to create a front and back side dimension. For banners as tall as 6 ft, it can be internally lit for even more drama! Requires specially sewn banners, and professional installation is recommended.

"The Dimensional Banner system from Voxpop generated more return than any other point-of-purchase campaign ever."

Don P - Ad Agency for Taco Bell

GARAGE BAY Display

Bay Banner Frame

Available for 2ft and 3 ft high banners

Finally! A simple and elegant way to mount banners in garage bay doorways. The bent steel tube and bungee system pulls the banners on all four corners to create 100% readable, effective merchandisers. This solution for sagging and fly-away bay banners turns your bays into powerful selling tools. They are simple to install and will last a lifetime. The powder coated tubes can be color matched to your decor.

Before

After

Coroplast & Signboard Display Frames

Voxpop has a variety of standard products to display rigid coroplast, signboard, styrene and related media. Whether your goal is simply to prevent fallen or disheveled displays, enhance your professional image, or to create visual impact with motion & placement, we've got a solution. We can also design a custom hardware solution to meet your individual requirements.

"No matter what I want to put up, I call Voxpop and they have something display it perfectly."

John Friedman, Friedman & Associates

Whether you want dramatic flair in the parking lot, upsell in the Drive Thru or maybe or just a better way to display your media, we've got an answer for you. For a company that cut its teeth on banner hardware, we've gotten pretty darn good at frames and holders for coroplast and signboards. This stuff doesn't hold itself up, so call us. We'll answer the phone live with a real live answer for your situation.

POLE, SIDEWALK or WALL Display

Swivelers

Our innovative Swiveler display system is wind-activated to attract attention and customers! The heavy-duty hardware displays coroplast panels that swivel - but not constantly - so they stay readable. We have several styles & sizes to choose from.

Standard Pole Model

The wind pushes, the display pulls.

Coroplast panels up to 4 ft tall create dramatic flair on parking lot or other poles. Heavy duty steel tubes support a center axis rod that inserts in the panel flutes, allowing them to swivel with the wind. That motion also means less wear on the panels, so Swivelers are great for longer term promotions. The frameworks are fully powder-coated in the color of your choice.

Single Sided

Double Sided

Displays square, rectangular or even die-cut shapes.

Circular Pole Model

The display is round and goes around. Results come around.

Single Sided

Double Sided

Circular Swivelers are a popular alternative, combining round panels on a flat steel arc mounting frame. The shape is a unique pole display that commands attention. Available for panels up to 30" in diameter.

Sidewalk Model

A display that stands alone.

Sidewalk Swivelers take the same great concept and put it wherever you like. Unlike traditional snap frames or A-frames, the panels move with the wind, and provide a two-sided display with a single panel. Because they give with the wind, no heavy water base or anchoring is needed.

Wall Models

No pole? No problem.

Standard and Circular models can both be mounted directly to any wall.

Coroplast panels for all Swiveler models must be 10mm thick, and printed so that flutes run vertically.

LAWN or DRIVE-THRU Display

U-Frames

We came up with a better idea for all those cheap wire stands, and we call it the the U-Frame. We make them from sturdy bent steel tube, with slots to slide in your graphics and lock them down. They are just as easy to install - simply bang a couple of anchor rods in the ground and slide the frame over. And we powder coat them to whatever color fits your motif. They last forever, so you can stop buying those cheap wire stands forever.

Sturdy. Attractive. Effective. Simple.

Sizes from small . . .

to tall.

Is this you?

This could be.

U-Frames will not only make your P.O.P. look a lot better, they will save you money in the long run.

LAWN or DRIVE-THRU Display

Lollypops

Put a little spin on your outdoor merchandising!

Lollypops are a sweet new idea for Drive-Thru or perimeter merchandising. We took the best features from our Swivelers and our U-Frames, put them together and came up with a display vehicle that offers wind-activated motion, a strong simple design, and a price point that will be candy for your budget.

Coroplast panels for Lollypops are best printed on both sides, with vertical flutes.

Go crazy with the die-cutter! Lollypops hold just about any shape.

POLE Display

Coroplast Pole Mount Frame

Coroplast pole signs don't hold themselves up. Our hardware frames do, and they do it well.

Lots of retailers use coroplast pole signs for outdoor merchandising, so we designed a solution to keep them from sliding down the poles, bending and looking, well . . . tacky. It costs good money to produce these signs and ship them out to your outlets. Why not invest a few dollars for a permanent guarantee that they will stay up, stay straight and look great? And when we say a few dollars, we mean it. The frames are not expensive at all.

Coroplast pole frames are available single sided, double sided, and in custom configurations for die-cut shapes.

Does this happen to you?

"Those zip-ties for hanging our signs are great unless we want them to stay up"

John B., Dash-In Food Stores

You can't see the hardware, but it's there. Working.

LAWN OR SIDEWALK Display

A-Frames

Voxpop has a variety of A-frame vehicles to display coroplast or other panel substrates. From our heavy duty steel angle models to swing models in 2 styles and an attractive tent frame, we haven't left any bases uncovered. All our frames are powder coated to look great and resist rusting. We have standard sizes to to 36" tall or wide, and custom sizes are available.

Standard A-Frame

Angle steel construction in 4 stock sizes up to 36"x24". Choose from slide-in or bolt-in powder-coated models.

EZ-Carry Tent Frame

White powder-coated steel legs, handle and polyethylene panels for screening or vinyl. Lightweight. 18"x24".

Swinging Rod Frame

Lightweight 3/8" powder-coated rod construction. Includes handle and straps for hanging panels. 18"x24".

Swinging A-Frame

Heavier-duty angle steel construction holds panels up to 24"x24". Powder-coated with straps for panels.

Low cost. Low maintenance. High portability. High ROI.

DRIVE-THRU Display

Preview Menu Board

Preview menu boards increase speed and decrease customer stress in the Drive-Thru.

The benefits of a preview menu board are hard to ignore. Advertised items and combos are clearly laid out on one attractive platform so customer decisions are made in advance. This speeds up traffic flow and helps upsell your promotional items. It reduces clutter, taking the place of multiple ad-hoc displays. And customers don't feel rushed when they arrive at the speaker to order.

We will custom design your boards to hold as many inserts at whatever size you desire, and powder-coat them to any color. Graphics panels can be coroplast or styrene - just slide them in from the side.

Beautifully designed for ease of use, solidly built for years of use.

DRIVE-THRU Display

Toppers & Extenders

Let us design a menu board topper or extender to highlight your temporary promotions and specials. Our all-steel holders are custom built to fit your equipment and powder-coated to match it. Choose from single or multiple cavities for coroplast or styrene panels that slide in easily from the top or the side.

Top off your sales and extend your profits with our custom designed add-on merchandisers for menu boards

FLAGS, FLAGPOLES & PENNANTS

Since our humble beginnings in 1989, we have sold a whole, whole lot of flags. And flag poles. Why? Because its the only part of our business where we sell the "Software" (flags) as well as the "Hardware" (Poles), we realized long ago its a symbiotic relationship. Good flags, good poles, happy customers, repeat business. Referrals. More volume, lower prices! It all works out. See more about our extensive flag and flag pole offerings on the next few pages . . .

"From a quality and value standpoint, Voxpop has the best flags & poles going"

Corporate Marketing Department memo

Triple-stitched fly ends and awesome graphics on our flags. "Defurling rings" and no-tools change-outs on our roof poles. State-of-the-art large aluminum or fiberglass main poles. The best graphite poles & stakes for our Bowflags. No matter the product, we take it seriously.

ROOFTOP or GROUND Display

Merchandising Flags & Flagpoles

When it comes to flags and poles ..

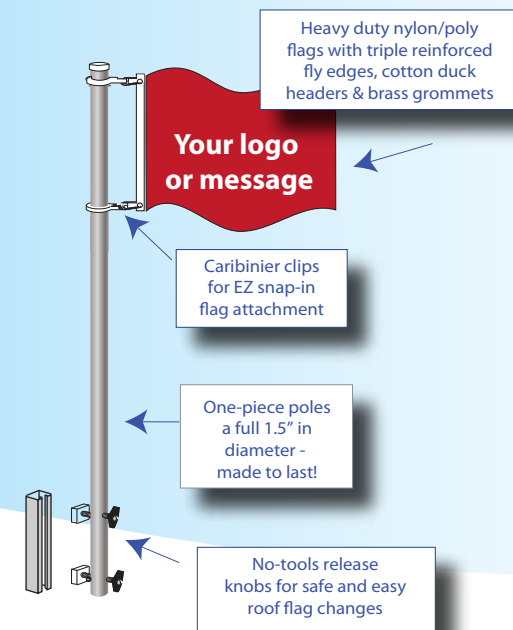

A flag display lining your rooftop or property is one of the most effective ways to attract attention to your locations. So at Voxpop, we take this big part of our product line seriously. Our flags are brilliantly printed and crafted to the most stringent specifications for durability, wear and fade resistance.

Stock or custom printed, we've got your flags.

.. we build a better mousetrap.

Our poles are the best in the business, with anti-furling rings to help your flags fly better and carbiner clips for quick and easy changes. We even designed our roof brackets with simple no-hands knobs for super easy installation. It's no wonder why so many national chains choose us.

And your poles.

GROUND or WALL Display

Large Flags & Flagpoles

Large outdoor flags show your patriotism and mark your locations from blocks away.

Outdoor flagpoles up to 80 feet tall with dozens of features and options.

When making an investment in large flags, you want quality, and the highest quality flags are all we have. Sewn and crafted to the strictest specifications for wear, anti-fraying and anti-fading, we use top of the line nylon or polyester material with superior dies. Triple & quadruple stitched fly-ends, durable headers, brass grommets and quality thimbles are standard features. Our US flags have embroidered stars and sewn bars - nothing is screenprinted.

We have a full line of stock US, State, Territory, Military and International flags in a variety of sizes. We can also screen or applique your logo or slogan. Our prices are highly competitive too!

US Flags in sizes from 4x6 to 50x80

We have partnered with the leading flag pole manufacturer in America to offer a complete line of outdoor poles. Sizes go from 16 ft up to 80 ft tall, in aluminum, fiberglass or diminishing steel. Choose from nautical style models, wall mounted models, & standard tapered in-ground models with a variety of features and options. External halyards, internal halyards, variety of finishes, revolving trucks, winches and even a choice of ornaments are just a few.

We'll consult with you on the best size and style pole for your location, and can arrange for on-site professional installation.

Vertical & Outrigger wall models

State, Territory & International Flags available in a variety of sizes.

Superior craftsmanship

Black Bronze Clear Satin

Aluminum flagpoles are available in 4 finishes.

Variety of ornaments

GROUND Display

Blade Flags & Feather Flags

Bowflags and Feather flags are a P.O.P. tour-de-force, creating dramatic displays that combine size, color and motion to draw attention. Like all our flags & poles, at Voxpop we carry only the best quality, but our volume allows us to provide them at extremely competitive prices.

We offer a variety of flag shapes in sizes all the way to 20 ft tall. Our graphite sectional poles mount on high quality steel ball bearing swivel bases. We have a huge selection of stock designs, or we can digitally produce your graphics for small runs or screenprint for large roll-outs.

Visual broadcasting at it's best. Say it out loud with a set of these dramatic merchandisers.

Variety of shapes and sizes up to 20 ft tall

Graphite sectional poles with carry bag

Ground Spikes 2 finishes

Ball bearing construction

Sidewalk base with water bag

Like all our flag display products, we offer only the best quality, for some of the best prices going. See why we are one of the country's leading suppliers of this popular and hugely successful product line.

Dozens and dozens of stock designs for retailers of all kinds. See them all at www.voxpopms.com.

POLE or BUILDING Display

Pennant & Fringe Strings

Dress up your locations and dress down your competition .

Pennant and fringe strings add a festive flair that undeniably attracts attention to your locations. Voxpop stocks a wide variety of styles, sizes and colors. We have economy strings for short-lived promos like grand openings or events, or long lasting cloth and metallic strings for months of performance. We also can custom print with your logo or message.

Strings available in lengths from 30 ft to 105 ft

Poly Pennants

Plasticloth Pennants

Metallic Fringe

US Flag

Race Check - Red or black

Custom Print & logo

At Voxpop, our slogan "Exterior Merchandising Excellence" doesn't just apply to our products. It defines our entire approach to help you get the most from your outdoor point-of-purchase campaigns.

When you call, we answer the phone right away. You will talk with a live customer service rep or account manager who will guide you through your experience, whether it's ensuring the best product, the right options, help with installation, or even referring you to one of our partner graphics producers.

If you are an agency, we'll help with your client presentations. If you are a franchisee or executive with one of the many chain retailers for which we are an approved vendor, we'll refer you to your corporate-specific web pages and literature. And if you just need an idea or want a custom design, we'll do our best to make it happen.

So call us. Or if you like, visit us on the web. We want to hear from you!
