

WinDancers

Rigid Flag Display Poles

WinDancers are a "rigid" flag system where the "flags" are made of coroplast that adapt to our popular rooftop or ground mounted flag poles. They have a special advantage over regular flags in that your logo or message is always readable, no matter what the wind conditions.

- ✓ Graphics panels attach to rings that allow them to swivel around the pole
- ✓ 100% readability ensures maximum marketing potential from the display
- ✓ Pole & bracket hardware is heavy duty, designed to last for years
- ✓ Graphics panels typically last far longer than standard flags

Models available for roof mounting or ground mounting. WinDancer panels are not made by Voxpop. We supply the poles, brackets and swivel system. Please consult your Voxpop sales representative for printing and cutting specifications for the coroplast graphics panels.

We don't make your P.O.P. We make it WORK!!!
